Care of Decorative Hardware

The decorative hardware on this furniture has been protected with a clear lacquer coat. Use of harsh detergents or brass polish in an attempt to obtain high luster will result in the removal of the protective lacquer and will damage the finish of the hardware. Do not use harsh detergents or brass polish. Use a soft, damp cloth to remove dust. All collections will maintain their beauty if treated with reasonable care. These simple procedures will keep Century's Case collections looking their best year after year.
